

FRESHKICKERS WEBSITE PROJECT PROPOSAL

1. Project Title

FreshKickers – Sneaker Cleaning and Customisation Website

Tagline:

Walk It Like You Talk It

2. Introduction

FreshKickers is a sneaker cleaning and customisation business that provides customers with professional sneaker washing, restoration and custom design services.

The purpose of this project is to develop a modern, user-friendly website that allows customers to learn about FreshKickers, view available services, make appointments, place orders and communicate with the business.

The website will provide customers with an easy and convenient way to access FreshKickers services without having to visit the business in person before making an enquiry or appointment.

3. Problem Statement

Many sneaker owners struggle to find reliable services for cleaning, restoring and customising their sneakers. Customers may also have difficulty finding information about prices, available services, appointment times and how to contact the business.

A website will solve these problems by providing all important FreshKickers information in one place.

The website will allow customers to:

- View FreshKickers services.
- View sneaker cleaning and customisation prices.
- Place an order.
- Book an appointment.
- Choose pickup and delivery options.
- Provide their contact and sneaker details.
- Contact FreshKickers through WhatsApp, phone, email and Facebook.
- Track an order using an order number.

4. Aim of the Project

The main aim of the FreshKickers website is to create a professional online platform that promotes sneaker cleaning and customisation services while making it easier for customers to interact with the business.

The website should be simple to navigate, visually attractive, responsive and easy to use on both computers and mobile devices.

5. Project Objectives

The objectives of the project are to:

1. Create a professional FreshKickers website.
2. Provide information about the business.
3. Display available sneaker cleaning and customisation services.
4. Display service prices.
5. Allow customers to place sneaker service orders.
6. Allow customers to book appointments.
7. Allow customers to select pickup and delivery options.
8. Collect customer information through forms.
9. Provide a working WhatsApp communication option.
10. Provide phone, email and Facebook contact options.

11. Provide an order tracking feature.
12. Make the website responsive on different screen sizes.
13. Use JavaScript to provide interactive features.
14. Use CSS to create a consistent and attractive design.
15. Create a simple and user-friendly navigation system.

6. Target Users

The main target users of the website are:

Sneaker Owners

Customers who need their sneakers cleaned, washed or restored.

Sneaker Enthusiasts

People who want unique customised sneakers that represent their personality and style.

Young Customers

Customers who regularly use social media and prefer communicating through platforms such as WhatsApp and Facebook.

Returning Customers

Existing FreshKickers customers who want to place another order or book another appointment.

7. Website Pages

The FreshKickers website will contain the following main pages:

7.1 Home Page

The Home page will introduce visitors to FreshKickers.

It will contain:

- FreshKickers logo/name.
- Tagline: "Walk It Like You Talk It".
- Navigation menu.
- Welcome message.
- Sneaker images.
- Sneaker Wash service.
- Custom Sneaker Design service.
- Links to other website pages.

The Home page will act as the starting point for visitors.

7.2 About Page

The About page will explain who FreshKickers is and what the business provides.

It will contain information about:

- The FreshKickers business.
- Sneaker cleaning.
- Sneaker restoration.
- Custom sneaker designs.
- The importance of keeping sneakers clean.
- Creativity and individuality through customisation.

The page will also contain images and a button allowing customers to view the available services.

7.3 Services Page

The Services page will provide detailed information about FreshKickers services.

Sneaker Wash

Available options include:

- Basic Sneaker Wash – R80
- Deep Cleaning – R120
- Premium Restoration – R180
- Pickup & Delivery – Additional R50
- Two pairs special – R140

Custom Sneaker Design

Available options include:

- Simple Design – From R250
- Anime Design – From R350
- Graffiti Design – From R350
- Full Custom Design – From R500
- Pickup & Delivery – Additional R50

Customers will also be able to place an order directly from the Services page.

7.4 Order System

The website will allow customers to provide information about their order.

The order form will collect:

- Full name.
- Mobile number.
- Email address.
- Service required.
- Sneaker brand.
- Number of sneaker pairs.
- Custom design style.
- Additional order details.
- Pickup or delivery option.

- Pickup/delivery address where applicable.

After submitting the order, the system will generate an order number such as:

FK-5832

The customer can use this number to track their order.

7.5 Appointment Page

The Appointment page will allow customers to schedule a visit or service.

Customers will provide:

- Full name.
- Phone number.
- Email address.
- Service required.
- Appointment date.
- Appointment time.
- Number of sneaker pairs.
- Sneaker brand.
- Pickup or delivery option.
- Pickup/delivery address.
- Additional information.

The system will generate an appointment number such as:

FK-APP-5832

The customer can keep this number as proof of their appointment.

The website will also prevent customers from selecting dates in the past.

7.6 Contact Page

The Contact page will provide several ways for customers to communicate with FreshKickers.

Phone

060 805 0577

The phone number will be clickable so that mobile users can call directly.

Email

FreshKickers@gmail.com

The email address will use a `mailto:` link so customers can click it to compose an email.

Address

64 11th Avenue, Kensington, Johannesburg

Facebook

A FreshKickers Facebook link will be provided.

WhatsApp

The website will include a WhatsApp button that opens a WhatsApp conversation with FreshKickers.

The WhatsApp button will contain a pre-written message to make contacting the business easier.

8. Order Tracking

The website will provide an order tracking feature.

After placing an order, the customer receives an order number.

The order can then be associated with different stages such as:

1. Order Received
2. Order Processing
3. Sneakers Being Cleaned/Customized
4. Ready for Pickup/Delivery
5. Order Completed

This provides customers with a clear understanding of the progress of their order.

9. Pickup and Delivery System

Customers will have two options:

Option 1 – Bring Sneakers

The customer brings their sneakers directly to FreshKickers.

Option 2 – Pickup & Delivery

FreshKickers collects the sneakers from the customer's address and returns them after the service has been completed.

An additional **R50** will be charged for the pickup and delivery service.

When the customer selects pickup and delivery, the website will automatically display an address field.

10. Technologies Used

The FreshKickers website will use the following technologies:

HTML

HTML will be used to create the structure of the website.

It will be used for:

- Headings.
- Paragraphs.
- Images.
- Forms.
- Buttons.
- Navigation.
- Links.

CSS

CSS will be used to control the appearance of the website.

The website will use:

- Dark backgrounds.
- Green accent colours.
- Responsive layouts.
- Cards.
- Buttons.
- Forms.
- Hover effects.
- Mobile-friendly layouts.

JavaScript

JavaScript will be used to make the website interactive.

JavaScript will handle features such as:

- Signup interactions.
- Form validation.
- Appointment booking.
- Order number generation.

- Order tracking.
- Showing and hiding pickup/delivery fields.
- Showing service information.
- Preventing past appointment dates.
- Saving information using browser local storage.

11. Website Design

The website will use a modern sneaker-inspired design.

The main colour scheme will be:

- Dark/black background.
- White text.
- Green accent colour.

The green accent colour will be approximately:

#29d17a

The dark background will create a modern appearance while the green colour will make important buttons and headings stand out.

The design will also use sneaker images to make the website visually appealing.

12. Navigation

The website will have a simple navigation menu.

The main navigation will contain:

Home | About | Services | Contact | Appointment

This allows users to quickly move between the different sections of the website.

13. User Experience

The website will be designed with usability in mind.

Users should be able to:

- Easily find services.
- Easily find prices.
- Quickly contact FreshKickers.
- Book an appointment without difficulty.
- Place an order using a simple form.
- Select pickup or delivery.
- Track their order using an order number.

Forms will use clear labels and required fields to reduce incorrect or incomplete information.

14. Functional Requirements

The website must be able to:

1. Display FreshKickers information.
2. Display available services.
3. Display service prices.
4. Navigate between pages.
5. Accept customer information.
6. Allow customers to place orders.
7. Generate order numbers.
8. Allow customers to track orders.
9. Allow customers to book appointments.
10. Generate appointment numbers.
11. Allow customers to select pickup or delivery.
12. Display an address field when pickup/delivery is selected.

13. Allow customers to contact FreshKickers through WhatsApp.
14. Allow customers to call FreshKickers.
15. Allow customers to email FreshKickers.
16. Provide a Facebook link.
17. Work on mobile and desktop screens.

15. Non-Functional Requirements

Usability

The website should be easy for customers to understand and navigate.

Performance

Pages should load quickly and avoid unnecessary features that slow down the website.

Responsiveness

The website should work on:

- Desktop computers.
- Laptops.
- Tablets.
- Mobile phones.

Accessibility

Text should be readable and buttons should be easy to identify and use.

Reliability

Forms should validate required information before they are submitted.

Maintainability

The website should use organised HTML, CSS and JavaScript so that changes can easily be made later.

16. Security and Validation

The website will use basic client-side validation.

Examples include:

- Required customer fields.
- Valid email format.
- Required service selection.
- Required appointment date.
- Required appointment time.
- Required number of sneaker pairs.
- Required pickup/delivery address when necessary.

The website will also prevent customers from selecting an appointment date in the past.

For a future version with a database, additional security measures would be required, including server-side validation, authentication and secure storage of customer information.

17. Future Improvements

The current website can later be expanded into a complete business management system.

Future improvements could include:

- Online database.
- Real customer accounts.
- Secure login and registration.

- Online payments.
- Automatic email confirmations.
- Automatic WhatsApp notifications.
- Real-time order tracking.
- Admin dashboard.
- Staff accounts.
- Customer order history.
- Uploading sneaker images.
- Online custom sneaker design previews.
- Automatic price calculation.
- Appointment availability management.

18. Expected Outcome

At the end of the project, FreshKickers will have a professional website that provides customers with information about the business and allows them to interact with the company online.

The website will provide a convenient platform for:

- Viewing services.
- Viewing prices.
- Placing orders.
- Booking appointments.
- Choosing pickup/delivery.
- Tracking orders.
- Contacting FreshKickers.

The website will also help FreshKickers establish an online presence and make the business more accessible to customers.

19. Conclusion

The FreshKickers website will provide a modern and convenient online solution for a sneaker cleaning and customisation business.

By combining HTML, CSS and JavaScript, the website will provide an attractive interface with interactive features such as order forms, appointment booking, order tracking and WhatsApp communication.

The project will improve the way customers interact with FreshKickers and provide a strong foundation for future development, including a database, customer accounts, online payments and a complete business management system.

FreshKickers – Walk It Like You Talk It.

FRESHKICKERS WEBSITE PROJECT PROPOSAL

1. Project Title

FreshKickers – Sneaker Cleaning and Customisation Website

Tagline:

Walk It Like You Talk It

2. Introduction

FreshKickers is a sneaker cleaning and customisation business that provides customers with professional sneaker washing, restoration and custom design services.

The purpose of this project is to develop a modern, user-friendly website that allows customers to learn about FreshKickers, view available services, make appointments, place orders and communicate with the business.

The website will provide customers with an easy and convenient way to access FreshKickers services without having to visit the business in person before making an enquiry or appointment.

3. Problem Statement

Many sneaker owners struggle to find reliable services for cleaning, restoring and customising their sneakers. Customers may also have difficulty finding information about prices, available services, appointment times and how to contact the business.

A website will solve these problems by providing all important FreshKickers information in one place.

The website will allow customers to:

- View FreshKickers services.
- View sneaker cleaning and customisation prices.
- Place an order.
- Book an appointment.
- Choose pickup and delivery options.
- Provide their contact and sneaker details.
- Contact FreshKickers through WhatsApp, phone, email and Facebook.
- Track an order using an order number.

4. Aim of the Project

The main aim of the FreshKickers website is to create a professional online platform that promotes sneaker cleaning and customisation services while making it easier for customers to interact with the business.

The website should be simple to navigate, visually attractive, responsive and easy to use on both computers and mobile devices.

5. Project Objectives

The objectives of the project are to:

1. Create a professional FreshKickers website.
2. Provide information about the business.
3. Display available sneaker cleaning and customisation services.
4. Display service prices.
5. Allow customers to place sneaker service orders.
6. Allow customers to book appointments.
7. Allow customers to select pickup and delivery options.
8. Collect customer information through forms.
9. Provide a working WhatsApp communication option.
10. Provide phone, email and Facebook contact options.
11. Provide an order tracking feature.
12. Make the website responsive on different screen sizes.
13. Use JavaScript to provide interactive features.
14. Use CSS to create a consistent and attractive design.
15. Create a simple and user-friendly navigation system.

6. Target Users

The main target users of the website are:

Sneaker Owners

Customers who need their sneakers cleaned, washed or restored.

Sneaker Enthusiasts

People who want unique customised sneakers that represent their personality and style.

Young Customers

Customers who regularly use social media and prefer communicating through platforms such as WhatsApp and Facebook.

Returning Customers

Existing FreshKickers customers who want to place another order or book another appointment.

7. Website Pages

The FreshKickers website will contain the following main pages:

7.1 Home Page

The Home page will introduce visitors to FreshKickers.

It will contain:

- FreshKickers logo/name.
- Tagline: "Walk It Like You Talk It".
- Navigation menu.
- Welcome message.
- Sneaker images.
- Sneaker Wash service.
- Custom Sneaker Design service.
- Links to other website pages.

The Home page will act as the starting point for visitors.

7.2 About Page

The About page will explain who FreshKickers is and what the business provides.

It will contain information about:

- The FreshKickers business.
- Sneaker cleaning.
- Sneaker restoration.

- Custom sneaker designs.
- The importance of keeping sneakers clean.
- Creativity and individuality through customisation.

The page will also contain images and a button allowing customers to view the available services.

7.3 Services Page

The Services page will provide detailed information about FreshKickers services.

Sneaker Wash

Available options include:

- Basic Sneaker Wash – R80
- Deep Cleaning – R120
- Premium Restoration – R180
- Pickup & Delivery – Additional R50
- Two pairs special – R140

Custom Sneaker Design

Available options include:

- Simple Design – From R250
- Anime Design – From R350
- Graffiti Design – From R350
- Full Custom Design – From R500
- Pickup & Delivery – Additional R50

Customers will also be able to place an order directly from the Services page.

7.4 Order System

The website will allow customers to provide information about their order.

The order form will collect:

- Full name.
- Mobile number.
- Email address.
- Service required.
- Sneaker brand.
- Number of sneaker pairs.
- Custom design style.
- Additional order details.
- Pickup or delivery option.
- Pickup/delivery address where applicable.

After submitting the order, the system will generate an order number such as:

FK-5832

The customer can use this number to track their order.

7.5 Appointment Page

The Appointment page will allow customers to schedule a visit or service.

Customers will provide:

- Full name.
- Phone number.
- Email address.
- Service required.
- Appointment date.
- Appointment time.
- Number of sneaker pairs.
- Sneaker brand.

- Pickup or delivery option.
- Pickup/delivery address.
- Additional information.

The system will generate an appointment number such as:

FK-APP-5832

The customer can keep this number as proof of their appointment.

The website will also prevent customers from selecting dates in the past.

7.6 Contact Page

The Contact page will provide several ways for customers to communicate with FreshKickers.

Phone

060 805 0577

The phone number will be clickable so that mobile users can call directly.

Email

FreshKickers@gmail.com

The email address will use a `mailto:` link so customers can click it to compose an email.

Address

64 11th Avenue, Kensington, Johannesburg

Facebook

A FreshKickers Facebook link will be provided.

WhatsApp

The website will include a WhatsApp button that opens a WhatsApp conversation with FreshKickers.

The WhatsApp button will contain a pre-written message to make contacting the business easier.

8. Order Tracking

The website will provide an order tracking feature.

After placing an order, the customer receives an order number.

The order can then be associated with different stages such as:

1. Order Received
2. Order Processing
3. Sneakers Being Cleaned/Customized
4. Ready for Pickup/Delivery
5. Order Completed

This provides customers with a clear understanding of the progress of their order.

9. Pickup and Delivery System

Customers will have two options:

Option 1 – Bring Sneakers

The customer brings their sneakers directly to FreshKickers.

Option 2 – Pickup & Delivery

FreshKickers collects the sneakers from the customer's address and returns them after the service has been completed.

An additional **R50** will be charged for the pickup and delivery service.

When the customer selects pickup and delivery, the website will automatically display an address field.

10. Technologies Used

The FreshKickers website will use the following technologies:

HTML

HTML will be used to create the structure of the website.

It will be used for:

- Headings.
- Paragraphs.
- Images.
- Forms.
- Buttons.
- Navigation.
- Links.

CSS

CSS will be used to control the appearance of the website.

The website will use:

- Dark backgrounds.
- Green accent colours.
- Responsive layouts.

- Cards.
- Buttons.
- Forms.
- Hover effects.
- Mobile-friendly layouts.

JavaScript

JavaScript will be used to make the website interactive.

JavaScript will handle features such as:

- Order tracking.
- Showing and hiding pickup/delivery fields.
- Showing service information.
- Preventing past appointment dates.
- Saving information using browser local storage.

11. Website Design

The website will use a modern sneaker-inspired design.

The main colour scheme will be:

- Dark/black background.
- White text.
- Green accent colour.

The green accent colour will be approximately:

#29d17a

The dark background will create a modern appearance while the green colour will make important buttons and headings stand out.

The design will also use sneaker images to make the website visually appealing.

12. Navigation

The website will have a simple navigation menu.

The main navigation will contain:

Home | About | Services | Contact | Appointment

This allows users to quickly move between the different sections of the website.

13. User Experience

The website will be designed with usability in mind.

Users should be able to:

- Easily find services.
- Easily find prices.
- Quickly contact FreshKickers.
- Book an appointment without difficulty.
- Place an order using a simple form.
- Select pickup or delivery.
- Track their order using an order number.

Forms will use clear labels and required fields to reduce incorrect or incomplete information.

14. Functional Requirements

The website must be able to:

1. Display FreshKickers information.
2. Display available services.
3. Display service prices.
4. Navigate between pages.
5. Accept customer information.
6. Allow customers to place orders.
7. Generate order numbers.
8. Allow customers to track orders.
9. Allow customers to book appointments.
10. Generate appointment numbers.
11. Allow customers to select pickup or delivery.
12. Display an address field when pickup/delivery is selected.
13. Allow customers to contact FreshKickers through WhatsApp.
14. Allow customers to call FreshKickers.
15. Allow customers to email FreshKickers.
16. Provide a Facebook link.
17. Work on mobile and desktop screens.

15. Non-Functional Requirements

Usability

The website should be easy for customers to understand and navigate.

Performance

Pages should load quickly and avoid unnecessary features that slow down the website.

Responsiveness

The website should work on:

- Desktop computers.
- Laptops.
- Tablets.
- Mobile phones.

Accessibility

Text should be readable and buttons should be easy to identify and use.

Reliability

Forms should validate required information before they are submitted.

Maintainability

The website should use organised HTML, CSS and JavaScript so that changes can easily be made later.

16. Security and Validation

The website will use basic client-side validation.

Examples include:

- Required customer fields.
- Valid email format.
- Required service selection.
